

Proline® Plus Mechanical Pipettes

Dependable Durability

Sartorius' mechanical pipette Proline Plus in the Biohit family is designed to offer comfort and quality in every day manual pipetting. While it shares many of the excellent features of mLINE, it has a personal design and a robust feel for heavier use. In addition, it has the widest pipette range, including fixed volume pipettes, for when volumes need to be ready-set to avoid errors. Proline Plus pipettes are an excellent choice for both experienced laboratory professionals and students.

- The widest range of pipettes for various users and applications
- Ergonomic design with light pipetting forces, comfortable handle and finger support for reduced risk of strain injuries
- Minimised risk of contamination with Safe-Cone Filters and full autoclavability
- Highly durable with strengthened structure also for heavier use

Widest range of pipettes, both adjustable and fixed volume, available

- Adjustable volume pipettes for professionals
- Fixed volume pipettes for specific applications to avoid volume errors

Optiload tip loading mechanism in multichannel models

- Allows tip loading with an equal constant force onto every channel
- Enables perfect tip sealing onto every individual tip cone
- Makes tip ejection light and easy

Features and Benefits

Volume setting with click stop
- Easy to use volume setting

Ergonomic finger support
- No need to squeeze the pipette during pipetting, reduces the risk of RSI

Light pipetting forces & ergonomic design
- Prevents repetitive strain injury (RSI)

Volume colour-coding
- Eases correct tip volume selection through matching colour code

Thermal insulation of internal components
- Improves accuracy

Large numbers in volume display
- Quick and easy-to-read volume minimises risk of volume setting errors

Easy to use "do-it-yourself" calibration
- Quick re-calibration possible e.g. for different liquids

Materials have high chemical and UV-resistance
- Highly durable and long lasting pipette

Only three parts to disassemble
- The easiest pipette to clean and maintain, improves purity

Fully autoclavable without disassembling
- Easy to steam sterilise, improves purity

Safe-Cone Filters available for models > 10 µl
- Contamination free pipetting

Widest Range of Pipettes

The Proline Plus family includes the widest range of pipettes, from 3 µl | 5µl to 10 ml, as both adjustable and fixed volume devices. The fixed volume pipettes are particularly useful in student laboratories or in any laboratory where the application requires a constant volume, ready-set, to avoid errors.

Ergonomic Design

A comfortable handle and ergonomic finger support enable effortless pipetting. There is no need to squeeze the handle during pipetting, thereby reducing the risk of RSI.

Perfect Tip Sealing with Optiload Tip Loading Mechanism in Multichannel Pipettes

All Proline Plus multichannel pipettes are equipped with spring loaded tip cones – the Optiload mechanism secures even tip sealing and simultaneously allows tips to be loaded and ejected with minimum force. This is a particular advantage in multichannel models, where tip loading and ejecting generally require more force. Using less force reduces the risk of hand injuries.

Prevent Contamination with Safe-Cone Filters

Replaceable Safe-Cone Filters act as a barrier, preventing aerosols or fluids from reaching the internal components of the pipette. Safe-Cone Filters are available for all Proline Plus models greater than 10 µl. These filters must be replaced regularly, and in every case of over-aspiration.

Maintenance and Calibration Made Easy

No opening tools are needed when cleaning and maintaining Proline Plus pipettes, and only three parts need to be cleaned. These pipettes can be easily calibrated using the tool provided with them.

Ordering Information

Proline Plus Starter Kit offers an opportunity to test and get started with Proline Plus. You can choose between four Starter Kits, with two or three single-channel Proline Plus pipettes.

All kits include a range of useful accessories, such as a pipette holder and a calibration tool that also acts as a tube opener, as well as the required instructions.
