EU

Regional labels capture the differences in the shipping and end of life impacts for each region (US, EU, UK) in which the product is sold.

Manufacturing Impact Reduction

- / Reduced energy usage and waste generation
- / Usage of special re-granulator to re-use unavoidable production waste as recycled raw material

Renewable Energy Use

Geothermal water-cooling system for mold cooling circuits

Shipping Impact

Made in Europe – optimized delivery routes

Packaging Content

Cartons made of ≥99% recycled material

Lowest Environmental Impact Factor in Serological Pipettes
