

Scope

This EMS relates to the sales and distribution of scientific and medical products from the UK facility at Greiner Bio-One. The EMS will also take into account the context of the organisation in terms of the environment and interested parties. Both of these areas are identified below.

Policy

Greiner Bio-One UK is committed to improving and protecting our environment through the setting of environmental objectives. In order to do this we concentrate on key areas where our business has an impact on the environment:-

Energy Consumption – we commit to use as little energy as possible within our operations including the renewal of end-of-life equipment with more energy efficient products.

Marketing – we commit to reducing our use of printed marketing material by moving towards electronic solutions for our catalogues and other media.

Waste – we commit to reduce waste from our operations and to recycle where possible any waste that cannot be avoided.

Pollution – we commit to preventing any pollution from our business activities.

Procurement – where possible we commit to use suppliers who have signed-up to our Code of Conduct or have equivalent environmental and social guarantees.

Compliance – we commit to monitor and fulfil our compliance obligations with all regulations, both legal and also those entered into voluntarily as part of standards that we hold.

Continuous Improvement – we commit to not standing still on our approach but will actively look to reduce and protect the environment year on year. This also includes the continual improvement of our environmental management system.

Signed:

Shabir Ahmed (Managing Director)
